The Linguistic Statement Analysis Technique®

Revealing the Language of Deception

LSAT
4926 St. Andrews Ct.
Loveland, CO 80537

LSAT® Solves Crimes!

Their Confession is Always in Their Statement

Driven by their subconscious mind, liars rely on a vocabulary of different words, phrases, content, statement structure, and other linguistic traits. LSAT training teaches investigators to identify these linguistic signals and apply the LSAT systematic process and accurately determine if the statement is truthful or deceptive. LSAT reveals far more information the author didn't intend to include. Use their own words against them!

Be a More Effective and Efficient Officer / Investigator

LSAT saves time and resources like no other investigative tool. Analysts become valuable resources to any investigations unit much like a polygraph examiner. With LSAT, the interviewer knows *prior to the interview*, what the deception is, where it lies, and what the truth really is. Attacking these areas using a unique interview strategy compels them to confess. Students will also learn how to incorporate these unique interview and interrogation strategies that use the person's own words to trap them in their lie and gain confessions.

About Our Training

LSAT training is not a superficial, 1-day overview! It is a thorough study of the technique. Four class hours lay the foundation for linguistic analysis. 18 class hours consist of hands-on, in-depth examination of the language used by truthful and deceptive people and how that language is be used to assess their credibility. All students analyze a minimum of seven statements bringing them to of skill level that allows for the practical and effective application of LSAT in criminal investigations.

Learn More about LSAT, view Daily Training Schedule, and examples analyses at our website: www.LinguisticStatementAnalysis.com

Recent Attendees of L.S.A.T. Training
